

# DULANJANA RATHNAYAKA

Business Analyst Intern | Information Systems Engineering Undergraduate

Malabe, Sri Lanka | +94 70 152 5868 | [dulanjanarmd@gmail.com](mailto:dulanjanarmd@gmail.com)

[linkedin.com/in/dulanjanarmd](https://linkedin.com/in/dulanjanarmd) | [github.com/dulanjanarmd](https://github.com/dulanjanarmd) | [dulanjanarmd.github.io/Dulanjana-Rathnayaka](https://dulanjanarmd.github.io/Dulanjana-Rathnayaka)

## PROFESSIONAL SUMMARY

Third-year Information Systems Engineering undergraduate at SLIIT, specializing in Business Analysis through 5 client-facing and independent projects across healthcare, e-commerce, and proptech domains. Proficient in requirements elicitation, BRD/SRS authoring, stakeholder management, and process modeling (BPMN, UML), complemented by practical Agile Scrum delivery experience as a Product Owner leading a 6-member team. Translates complex business needs into clear, traceable requirements, backed by hands-on technical delivery experience in Java, Spring Boot, and MySQL-based systems.

## SKILLS

**Business Analysis & Requirements:** Requirements Elicitation • Requirements Analysis • Requirements Documentation (BRD, SRS) • Functional & Non-Functional Requirements • User Stories • Acceptance Criteria • Requirements Traceability Matrix (RTM) • Stakeholder Management • Stakeholder Analysis • Gap Analysis

**Process & Data Modeling:** Business Process Analysis • Business Process Modeling • Use Case Modeling • BPMN • UML • Data Modeling • Wireframing • Role-Based Access Control

**Methodologies & Delivery:** Agile Scrum • SDLC • Sprint Planning • Backlog Management • MoSCoW Prioritization • User Acceptance Testing (UAT) • System Design Documentation • Change Management • Risk Identification

**Technical & Data Analysis:** SQL • Power BI • Excel • Python (Pandas) • Data Analysis • Java • Spring Boot • MySQL • REST APIs • Git

**Tools & Platforms:** Jira • Trello • Figma • Lucidchart • GitHub • Microsoft Office (Word, PowerPoint)

**Professional Skills:** Verbal & Written Communication • Problem-Solving • Teamwork

## RELEVANT PROJECT EXPERIENCE

### RentLens – Smart Rental Decision & Tenant Risk Analysis Platform

Aug 2026 – Sep 2026

Business Analyst | Individual Project

- Authored a Business Requirements Document (BRD) and Software Requirements Specification (SRS) covering 8 functional modules and business rules for rental decision-making.
- Prioritized requirements using MoSCoW and defined 10 user stories with acceptance criteria across 3 user groups: Tenants, Landlords, and Administrators.
- Built a Requirements Traceability Matrix (RTM) linking 10 user stories and acceptance criteria to corresponding system modules, ensuring requirements coverage and validation.
- Defined a data dictionary and entity relationships supporting the platform's property comparison, budget-based recommendation, complaint analytics, and market reporting features.
- Tech: React.js, Spring Boot, Java 17, MySQL, Leaflet.js, Recharts, REST APIs | [github.com/dulanjanarmd/RentLens](https://github.com/dulanjanarmd/RentLens)

### LankaThread – Online Fashion Store E-Commerce Platform

Jun 2026 – Jul 2026

Business Analyst | Individual Project

- Elicited and documented functional and non-functional requirements through 12 user stories covering Customer and Admin roles, including cash-on-delivery payment and WhatsApp-based customer support.
- Mapped order placement, payment processing, and delivery workflows using BPMN swimlanes and decision gateways to formalize business rules and process logic.
- Modeled 5 UML diagrams — Use Case, Class, Sequence, State, and Component — to translate business requirements into system behavior and interactions.
- Developed high-fidelity Figma wireframes for the product listing, product details, cart, and checkout flows, then translated the approved design into a MySQL data model.
- Tech: BPMN, UML, Figma, Requirements Analysis, REST API Design, MySQL | [github.com/dulanjanarmd/LankaThread](https://github.com/dulanjanarmd/LankaThread)

### Global Superstore Sales Analysis & Dashboard

Jan 2026

Data Analysis | Individual Project

- Analyzed a retail dataset containing 50,000+ records using Python (Pandas) and Excel to identify sales, profit, and margin patterns.
- Designed interactive Power BI dashboards with KPI cards and filters to support data-driven decision-making and ongoing performance monitoring.
- Identified top-performing products and underperforming regions through visual analysis, informing recommendations on sales performance.

- Tech: Power BI, Python (Pandas), Excel | [github.com/dulanjanarnd/Superstore-Sales-Analysis](https://github.com/dulanjanarnd/Superstore-Sales-Analysis)

## Prime Medical – Doctor Appointment & Patient Management System

Jan 2026 – Apr 2026

Product Owner (Student Lead) & Development Contributor | Client Project, Faculty-Supervised | 6-Member Team

- Conducted stakeholder interviews to elicit business requirements for appointments, consultations, prescriptions, pharmacy, and billing operations.
- Converted stakeholder needs into user stories and prioritized the product backlog across 6 epics within a 14-week Agile delivery cycle.
- Specified clear acceptance criteria across 6 core areas: appointment, consultation, and prescription management, pharmacy, billing, and reporting.
- Validated system functionality against acceptance criteria during User Acceptance Testing (UAT) and incorporated client feedback into the product backlog.
- Proposed process improvements to reduce manual paperwork and prevent double-booking through streamlined scheduling workflows.
- Tech: Requirements Gathering, Stakeholder Interviews, Requirements Validation, Agile Scrum, User Stories, Backlog Management, Spring Boot, React, MySQL | [github.com/dulanjanarnd/PrimeMedical-PharmInvent](https://github.com/dulanjanarnd/PrimeMedical-PharmInvent)

## Lanka Health Insurance – Health Insurance Management System

Jul 2025 – Oct 2025

Team Leader | 6-Member Team | 14-Week Agile Scrum Project

- Gathered and analyzed requirements for 6 system components, mapping business needs to system capabilities and documenting requirements and project artifacts.
- Created 5 UML models — Use Case, Class, Sequence, Activity, and ER — to document system requirements and business processes.
- Designed workflows for insurance claims, policy management, and role-based access to reflect key business processes and user interactions.
- Facilitated requirements validation and backlog prioritization, preparing system design documentation and presenting sprint progress to the team and faculty supervisor.
- Tech: Agile Scrum, Requirements Elicitation, Requirements Analysis, UML, Process Modeling, System Design Documentation, Spring Boot, MySQL, Role-Based Access Control | [github.com/dulanjanarnd/Lanka-Health-Insurance](https://github.com/dulanjanarnd/Lanka-Health-Insurance)

## EDUCATION

---

### BSc (Hons) in Information Systems Engineering

Oct 2024 – Jun 2028

Sri Lanka Institute of Information Technology (SLIIT), Malabe, Sri Lanka | Currently in Year 3, Semester 1

## CERTIFICATIONS

---

IBM Business Analyst Professional Certificate, Coursera

IBM Data Analyst Professional Certificate, Coursera
