

Here is the customized RASCI Table for **Prismo Constructions + ConstructFlow**.

Because Prismo is a **small organization**, I have simplified the roles to only the real ones that exist:

Roles Used

Role	Description
CEO	Top management / final accountability
Project Manager (PM)	Main owner of ConstructFlow and projects
Admin Officer	System administration, user accounts, support
Site Engineer	Field user (progress, photos, tasks)
Client	External user (view progress + approvals)

Simplified RASCI Table (Ready to Copy)

ISO/IEC 27002 Control Area	CEO	Project Manager	Admin Officer	Site Engineer	Client
5. Information Security Policies	A	R	S	I	I
6.1 Information security roles & responsibilities	A	R	S	I	I
6.2 Mobile devices & teleworking	A	R	S	S	I
7.2.2 Security awareness & training	A	R	S	I	-
8.1 Asset management (Inventory & Ownership)	A	R	S	I	-
8.2 Information classification	A	R	S	I	I
9. Access Control (Policy, RBAC, MFA, Passwords)	A	R	S	I	I
9.2 User registration & access rights management	A	C	R	I	I
10. Cryptography (HTTPS, Encryption)	A	R	S	I	I
12.2 Protection from malware (Endpoint protection)	A	R	S	S	-
12.3 Information backup	A	R	S	I	-

ISO/IEC 27002 Control Area	CEO	Project Manager	Admin Officer	Site Engineer	Client
12.4 Logging and monitoring	A	C	R	I	-
13.1 Network security & segregation	A	R	S	I	I
13.2 Information transfer (stop WhatsApp/email)	A	R	S	S	I
14.1 Security requirements of information systems	A	R	S	I	I
16. Information security incident management	A	R	S	S	I
17. Business continuity / Backup & recovery	A	R	S	I	-

Legend

- **R** = Responsible (does the work)
 - **A** = Accountable (final ownership / can be blamed)
 - **S** = Supportive (actively helps)
 - **C** = Consulted (gives input)
 - **I** = Informed (needs to know)
 - **-** = Not involved
-

How to Use This in Your Report

You can write:

“A simplified RASCI matrix was developed based on the ISO27k Toolkit, adapted to the small organizational structure of Prismo Constructions. The **CEO** is Accountable for all major security decisions. The **Project Manager** is Responsible for most operational security controls related to ConstructFlow. The **Admin Officer** supports system administration, user management, and logging. Site Engineers and Clients are primarily Informed or Supportive users of the system.”

Would you like me to also prepare a **one-page summary** of all the Toolkit documents you have now completed (Asset Register + Risk Register + SoA + Classification Matrix + RASCI + Gap Analysis) so you can easily put it in the Appendices?
