PROFESSIONAL SUMMARY

Third-year Information Systems Engineering undergraduate seeking a Trainee Business Analyst / Project Manager role, with hands-on experience spanning both business analysis and Agile project delivery across client-facing healthcare and independent software projects. Served as Product Owner and Team Leader, leading 6-member Agile Scrum teams end-to-end conducting thorough analysis of business processes, eliciting and documenting requirements, prioritising backlogs, planning sprints, managing risks and timelines, and coordinating stakeholders through effective communication and close collaboration to User Acceptance Testing. Works independently and collaboratively with cross-functional teams, combining strong analytical, problem-solving, and interpersonal skills with proven project delivery and a technical foundation in SQL, Power BI, and system design.

SKILLS

Business Analysis: Requirements Elicitation • Requirements Analysis • Requirements Documentation • Functional Requirements • Non-Functional Requirements • Stakeholder Management • Stakeholder Analysis • Business Process Analysis • Data Analysis • Gap Analysis

Project Management: Sprint Planning • Backlog Management • Agile Scrum • Kanban • Waterfall & SDLC • Scope, Timeline & Milestone Tracking • Risk Identification & Mitigation • Resource Allocation • Change Management • MoSCoW Prioritisation

Requirements & Modelling: User Stories • Acceptance Criteria • Use Case Modelling • BPMN • UML • Wireframing • Business Process Modelling

Leadership & Coordination: Team Leadership • Cross-Functional Coordination • Meeting Facilitation • Status Reporting • Client Communication • UAT Coordination

Data & Technical: SQL • Power BI • Microsoft Excel • Python (Pandas) • Java • Spring Boot • MySQL • REST APIs • Git

Tools: Jira • Trello • Figma • Lucidchart • GitHub • Microsoft Office (Word, PowerPoint) • MS project

Professional Skills: Effective Communication • Problem-Solving Skills • Interpersonal Skills • Analytical Thinking • Ability to Work Independently • Collaboration • Time Management • Teamwork

RELEVANT PROJECT EXPERIENCE

RentLens – Smart Rental Decision & Tenant Risk Analysis Platform

Aug 2026 – Sep 2026

Business Analyst | Individual Project

- Authored a Business Requirements Document (BRD) and Software Requirements Specification (SRS) covering 8 functional modules, non-functional requirements, and business rules for rental decision-making.
- Prioritised requirements using MoSCoW and defined 10 user stories with acceptance criteria across 3 user groups: Tenants, Landlords, and Administrators.
- Built a Requirements Traceability Matrix (RTM) linking 10 user stories and acceptance criteria to corresponding system modules, ensuring requirements coverage and validation.
- Defined a data dictionary and entity relationships for property comparison, budget-based recommendations, complaint analytics, and market reporting.

Tech: React.js, Spring Boot, Java 17, MySQL, Leaflet.js, Recharts, REST APIs | <https://github.com/dulanjanarmd/RentLens>

LankaThread – Online Fashion Store E-Commerce Platform

Jun 2026 – Jul 2026

Business Analyst | Individual Project

- Elicited and documented functional and non-functional requirements through 12 user stories covering Customer and Admin roles, including cash-on-delivery and WhatsApp support.
- Mapped order placement, payment processing, and delivery workflows using BPMN swimlanes and decision gateways to document process flows and business rules.
- Modelled 5 UML diagrams: Use Case, Class, Sequence, State, and Component diagrams to translate business requirements into system behaviour and interactions.
- Developed high-fidelity Figma wireframes for product listing, product details, cart, and checkout flows, and translated the design into a MySQL data model.

Tech: BPMN, UML, Figma, Requirements Analysis, REST API Design, MySQL | <https://github.com/dulanjanarmd/LankaThread>

Global Superstore Sales Analysis & Dashboard

Jan 2026

Data Analysis | Individual Project

- Analysed a retail dataset containing 50,000+ records using Python (Pandas) and Excel to identify sales, profit, and margin patterns.
- Designed interactive Power BI dashboards with KPI cards and filters to support data-driven decision-making, performance monitoring, and data visualisation.
- Identified top-performing products and underperforming areas through visual analysis, supporting sales performance analysis.

Tech: Power BI, Python (Pandas), Excel | <https://github.com/dulanjanarmd/Superstore-Sales-Analysis>

Prime Medical – Doctor Appointment & Patient Management System

Jan 2026 – Apr 2026

Product Owner & Development Team Member | Client Project | 6-Member Team

- Conducted stakeholder interviews to elicit business requirements for appointments, consultations, prescriptions, pharmacy, and billing operations.
- Converted stakeholder needs into user stories and prioritized the product backlog across 6 epics within a 14-week Agile delivery cycle.
- Specified clear acceptance criteria across 6 core areas: appointment management, consultation management, prescription management, pharmacy, billing, and reporting.
- Validated system functionality against acceptance criteria during User Acceptance Testing (UAT) and incorporated client feedback into the product backlog.
- Proposed process improvements to reduce manual paperwork and prevent double-booking appointments through streamlined appointment workflows.

Tech: Requirements Gathering, Stakeholder Interviews, Requirements Validation, Agile Scrum, User Stories, Backlog Management, Spring Boot, React, MySQL | <https://github.com/dulanjanarmd/PrimeMedical-PharmInvent>

Lanka Health Insurance – Health Insurance Management System

Jul 2025 – Oct 2025

Team Leader | 6-Member Team | 14-Week Agile Scrum Project

- Led a 6-member team through a 14-week Agile Scrum project, coordinating requirements activities, sprint planning, task allocation, and documentation.
- Elicited and analysed requirements for 6 system components, mapping business needs to functional system capabilities and documenting functional requirements and project artefacts.
- Created 5 UML models, including Use Case, Class, Sequence, Activity, and ER diagrams, to document system requirements and business processes.
- Designed workflows for insurance claims, policy management, and role-based access to reflect key business processes and user interactions.
- Facilitated requirements validation and backlog prioritisation, preparing system design documentation and presenting sprint progress to the team and faculty supervisor.

Tech: Agile Scrum, Requirements Elicitation, Requirements Analysis, UML, Process Modelling, System Design Documentation, Spring Boot, MySQL, Role-Based Access Control | <https://github.com/dulanjanarmd/Lanka-Health-Insurance>

EDUCATION

BSc (Hons) in Information Systems Engineering

Oct 2024 - Jun 2028

Sri Lanka Institute of Information Technology (SLIIT), Malabe, Sri Lanka | Currently in Year 3, Semester 1
